

Education workshops

Our Be Dog Smart programme focusses on Safe Behaviour Around Dogs, and every year we work with hundreds of schools, offering free workshops and assemblies.

-  We aim to harness safe, loving relationships between children and dogs, by encouraging them to adopt safe and kind behaviours towards their canine friends.
-  Our workshops are engaging and interactive, designed to compliment areas of the curriculum and generally support classroom learning.
-  Run by our trained and experienced Education and Community Officers who aim to provide options for schools to best suit their environments, timetables, and capacity to facilitate external guests.

To find out more and to book, contact your local Education and Community Officer via our website: learnwithdogstrust.org.uk

Our target age group is 7-11 years. We can extend to 5-7 year olds, but only when a minimum of two workshops for children age 7-11 are booked.
